

NT-8512-2

POLYESTER / SILICONE MASKING TAPE

SINGLE COATED TAPE

NT 8512-2 is a green polyester tape silicone-coated with controlled adhesion and excellent abrasion resistance. This protective mask removes cleanly with no adhesive residue. High temperature and chemical resistance.

FEATURES & BENEFITS

- Suitable for bonding different surfaces
- Fine line definition
- Clean removal / No adhesive residue
- Chemical resistance
- High temperature resistance

PRODUCT CONFIGURATION

- 50,8 μ Polyester Film
- 38,1 μ Silicone Adhesive
- Green Color

PERFORMANCE

Breaking Strength:	87 N/cm.
Elongation:	90%
Adhesion to steel: (N/cm silicone)	3,8 N/cm.
Dielectric Strength:	6.500 volts
Temperature Range:	-51°C to 180°C (Up to 230° short time)

TYPICAL APPLICATIONS

- Powder coating
- Splicing siliconized papers, films, textiles
- High temperature masking
